

7. Publications

- M. L. Apicella, G. Mazzitelli, B. Esposito, L. Gabellieri, M. Leigheb, V. Pericoli Ridolfini, L. Pieroni, M. Romanelli, R. Zagórski, and FTU team. Effects of wall boron coating on FTU, an all metallic and carbon free medium size tokamak. *Nucl. Fusion*, 45(7):685, 2005.
- J. Badziak, S. Głowacz, S. Jabłoński, P. Parys, J. Wołowski, and H. Hora. Laser-driven generation of high-current ion beams using skin-layer ponderomotive acceleration. *Laser and Particle Beams*, 23:401-409, 2005.
- A. Banaszak, A. Szydłowski, M. J. Sadowski, M. Paduch, H. Schmidt, M. Scholz, J. Wołowski, G. Bonheure, and G. Van Wassenhove. Application of PM-355 solid-state nuclear track detectors for ion diagnostics in high-temperature plasma experiments. *Czechoslovak J. Phys.*, 54(Suppl. C):C223-C227, 2004.
- H. Gerhauser, R. Zagórski, D. Reiser, and M. Z. Tokar. Numerical modelling of changes of edge plasma transport due to the presence of TEXTOR-DED. *J. Nucl. Mat.*, 337-339:337-341, 2005.
- P. Gašior, J. Badziak, A. Czarnecka, P. Parys, J. Wołowski, M. Rosiński, V. Phillips, and M. Rubel. The ion diagnostic methods - a novel technique of characterisation of laser induced deuterium removal from in vessel tokamak components. In *Proc. of 5th International Workshop and Summer School: Towards Fusion Energy-Plasma Physics, Diagnostics, Spin-offs*, Kudowa Zdrój, Poland, June 2005. IPPLM.
- P. Gašior, J. Badziak, J. Makowski, P. Parys, J. Wołowski, M. Rosiński, L. Ryć, V. Philipps, and M. Rubel. Application of pulsed laser light for the removal of co-deposited deuterium/tritium from in vessel components. In *Proc. of the European Congress on Advanced Materials and Processes*, Prague, Czech Republic, September 2005. <http://www.extremat.org>.
- S. Jabłoński, H. Hora, S. Głowacz, J. Badziak, Yu. Cang, and F. Osman. Two-fluid computations of plasma block dynamics for numerical analyze of rippling effect. *Laser and Particle Beams*, 23:433-440, 2005.
- L. Láska, J. Badziak, F. P. Boody, S. Gammino, L. Juha, K. Jungwirth, J. Krása, E. Krouský, A. Mezzasalma, P. Parys, M. Pfeifer, K. Rohlena, L. Torrasi, J. Ullschmied, and J. Wołowski. Several promising application possibilities of high-power iodine laser. In *Proc. of the 5th ISAPS Conf.*, Hilo, USA, 2005.
- L. Láska, K. Jungwirth, J. Krása, M. Pfeifer, K. Rohlena, J. Ullschmied, J. Badziak, P. Parys, L. Ryć, J. Wołowski, S. Gammino, L. Torrasi, and F. P. Boody. The effect of pre-plasma and self-focusing on characteristics of laser produced ions. *Czechoslovak J. Phys.*, 55(6):691-699, 2005.
- L. Láska, K. Jungwirth, J. Krása, M. Pfeifer, K. Rohlena, J. Ullschmied, J. Badziak, P. Parys, J. Wołowski, S. Gammino, L. Torrasi, and F. P. Boody. Laser production of ions at different pre-formed plasma conditions. *Appl. Phys. Lett.*, 86:081502, 2005.
- L. Láska, L. Ryć, J. Badziak, F. P. Boody, S. Gammino, K. Jungwirth, J. Krása, E. Krouský, A. Mezzasalma, P. Parys, M. Pfeifer, K. Rohlena, L. Torrasi, J. Ullschmied, and J. Wołowski. Correlation of highly charged ion and X-ray emissions from the laser-produced plasma in the presence of non-linear phenomena. *Radiation Effects & Defects in Solids*, 160:557-566, 2005.
- P. Machác and L. Ryć. Metal resistor bolometer for X-ray measurement. In Jaroslav Bousek, editor, *Proc. EDS'05 IMAPS CS International Conference*, pages 275-278, Brno, the Czech Republic, September 2005.

N. McTaggart, R. Zagórski, X. Bonnin, A. Runov, R. Schneider, T. Kaiserc, T. Rognlien, and M. Umansky. 3D edge energy transport in stellarator configurations. *J. Nucl. Mat.*, 337-339:221-226, 2005.

A. Picciotto, L. Torrasi, S. Gammino, A. M. Mezzasalma, F. Caridi, D. Margarone, L. Andó, J. Krása, L. Láska, and J. Wołowski. Temperature measurements in plasmas generated by using lasers at different intensities. *Radiation Effects & Defects in Solids*, 160:705-713, 2005.

K. Rohlena, L. Láska, K. Jungwirth, J. Krása, E. Krokusy, M. Masek, M. Pfeifer, J. Ullschmied, J. Badziak, P. Parys, J. Wołowski, S. Gammino, L. Torrasi, and F. P. Boody. Characteristics and applications of ion streams produced by long-pulse lasers. *Plasma Phys. Control. Fusion*, 47:B503-B512, 2005.

M. J. Sadowski, L. Jakubowski, and A. Szydłowski. Adaptation of selected diagnostic techniques to magnetic confinement fusion experiments. *Czechoslovak J. Phys.*, 54 (Suppl. C):C74-C81, 2004.

A. Szydłowski, A. Banaszak, M. J. Sadowski, M. Scholz, and J. Wołowski. Advantages of the use of solid-state nuclear track detectors in high-temperature plasma experiments. *Radiation Measurements*, 40:479-482, 2005.

G. Telesca, K. Crombé, M. Tokar, B. Unterberg, G. Verdoolaege, R. Zagórski, and G. Van Oost. Preliminary study of the influence of DED on carbon radiation and transport in the TEXTOR tokamak. *J. Nucl. Mat.*, 337-339:361-365, 2005.

R. Zagórski and R. Stankiewicz. Influence of core-edge coupling and impurities on the operation regimes of a fusion reactor. *J. Nucl. Mat.*, 337-339:191-195, 2005.
